IS INSURANCE ENOUGH?

Check your policy:

Documentation is critical after a major loss. Poor documentation is a **costly \$\$\$ mistake!**

1. Consider a major loss: How would being paid \$10,000 instead of \$100,000 affect your family?
2. Do you have a current, verifiable & easy to update inventory?
3. Are your Estate Records & Inventory accessible to family from anywhere?
4. Do you have a powerful App to keep your inventory, and estate up to date?

iINVENTORYpro.com provides peace of mind and security for your family by helping you document the info required by your Insurance Company & needed by your estate: quickly & efficiently.

Our inventory software and/or trained professionals can help you identify & store important items, collections, warranties, and documents that you may not have even considered.

The last thing you will want to do after a major loss is to create an inventory or reconstruct one that was just destroyed. Waiting until after a loss to make an inventory is a major mistake!

Fighting for your money can take years in court at a time when you need it most! Have your inventory done in advance so your ins. claim can be first in line & you can focus on your family.
